

# Premium-6 Centre Strand Docking Netting

## PRODUCT DESCRIPTION

Bayonet Premium-6 Centre Strand Docking Netting is light, portable and deceptively strong. And with our small, 41mm mesh, even the youngest lambs can be herded safely.

Bayonet Premium-6 Centre Strand Docking Netting provides all the stopping power you need, in a high quality, New Zealand made hexagonal netting with reinforcing strands. Made from 1.4mm diameter wire, it'll stand up to anything a mob of stropo ewes might throw at it. It's lightweight, easy to carry and can be re-rolled for repeated use, year after year.

When it comes to penning young lambs, there's always a risk of injury. Bayonet Premium-6 Centre Strand Docking Netting has a small, 41mm mesh, specially designed to prevent head penetration. Even the youngest lambs can be herded in safely.

Bayonet Premium-6 has a heavy 185g/m<sup>2</sup> galv coating for improved durability and rust resistance. This increases the usable life by up to six times over light galv products. Plus, our supersized core helps you reduce wastage as netting unrolls easily, right to the end of the roll.

## SIZE RANGE AVAILABLE

Product Code	Width (mm)	Mesh (mm)	Wire Diameter (mm)	Length (m)	Weight (kg)	Barcode
HN1800411450CSP6	1800	41	1.4	50	68.00	9421026721914
HN900411450CSP6	900	41	1.4	50	36.00	9421026722188

## FEATURES

- Bayonet Premium-6 Centre Strand Docking Netting is a portable, lightweight netting, predominantly used to create temporary docking yards.
- It consists of a high quality, New Zealand made 41mm hexagonal netting with a reinforcing wire at 225mm spacings.
- Light yet robust, it is highly portable and can be re-rolled for repeated use.
- Made from 1.4mm diameter wire for increased strength and superior stock resistance.
- Small mesh size prevents head penetration, significantly reducing risk to lambs.
- Heavy 185g/m<sup>2</sup> galv coating improves durability and rust resistance, delivering up to 6 times longer life than light galv product.
- Supersized core reduces wastage as netting unrolls easily, right to the end of the roll.
- Galvanising complies with AS/NZS 4534: 2006 Class W10.
- Netting complies with NZS 4251: 2007.
- Bayonet Premium-6 Centre Strand Docking Netting is also suitable for dog runs and general garden use.
