

Premium-6 Rabbit Netting

PRODUCT DESCRIPTION

Bayonet Premium-6 Rabbit Netting is stronger, longer-lasting and great to work with. You'll invest in the future with a rabbit control barrier that keeps on working, year after year.

Bayonet Premium-6 is a high quality New Zealand made hexagonal wire netting, with a heavy 185g/m² galv coating for improved durability and rust resistance. This increases the usable life by up to six times over light galv products. Made from 1.4mm diameter wire, Bayonet Premium-6 also delivers a stronger, more robust fence.

Bayonet Premium-6 has twin edge wires for ease of tensioning and a smooth, consistent finish that makes it easier on your hands. Plus, our supersized core helps you reduce wastage and eliminate the guesswork. Netting unrolls easily right to the end of the roll, so you can accurately calculate exactly how much you need for the job.

For a long-term rabbit control solution, Bayonet Premium-6 Rabbit Netting is your obvious choice.

SIZE RANGE AVAILABLE

FEATURES

- High quality New Zealand made netting.
- Heavy 185g/m² galv coating improves durability and rust resistance, delivering up to 6 times longer life than light galv netting.
- Made from 1.4mm diameter wire for increased strength and stock resistance.
- Twin edge wires for ease of tensioning.
- Supersized core reduces wastage as netting unrolls easily, right to the end of the roll.
- Galvanising complies with AS/NZS 4534: 2006 Class W10.
- Netting complies with NZS 4251: 2007.
- When used in rabbit fencing, it provides an effective, long-term barrier against rabbit movement.
