

Premium-6 Wire Ties

PRODUCT DESCRIPTION

Bayonet Premium-6 Wire Ties are strong, easy to use, and suited to a huge range of uses. Plus, they'll keep on working up to six times longer than light galv wire ties.

Made from high quality New Zealand made wire, Bayonet Premium-6 Wire Ties are heavily galvanised for improved durability and rust resistance. Use them with confidence for tying and securing applications in agriculture, building, construction, civil

engineering and general industry. Common uses include closing bags and sacks, tying reinforced mesh and fixing chain link netting in place.

Ready-cut and double-looped, Bayonet Premium-6 Wire Ties are available in a range of lengths to suit every application. They are packaged in handy 1,000 tie bundles for your convenience.

SIZE RANGE AVAILABLE

Product Code	Length (mm)	Number of ties	Barcode

FEATURES

- Bayonet Premium-6 Wire Ties are constructed from 1.6mm heavily galvanised wire. They are pre-cut and double-looped.
- High quality heavy galv wire improves durability and rust resistance, delivering up to six times the life-span of light galv wire.
- Made in New Zealand using some of the best raw materials.
- Made from low tensile wire for maximum flexibility and ease of twisting.
- Bayonet Premium-6 Wire Ties are ideal for a range of securing and tying applications in agriculture, building, construction, civil engineering and general industry.
- Available in your choice of lengths from 110mm to 300mm.
- Packaged in handy 1000 tie bundles.
- Commonly used to close bags such as feed sacks.
- A fast and convenient way to tie reinforced mesh or fix chain link netting in place.
- Complies with Coating Standard AS/NZS 4534: 2006 Class W10.
