

SUMMARY OF FEATURES

- Wire tensile strength 450 - 550 mpa.
- Galvanisation 70g/m² coating (standard galv).
- Consistent appearance.
- New Zealand made.

TECHNICAL INFORMATION

Product Description

Bayonet Premium Welded Mesh is suitable for a wide range of uses including anti-slip mesh for boardwalks, tree guards, and small animal caging such as aviaries, dog runs and chicken coops.

In the construction industry, it is used for fencing panels and partitions.

Performance

Galvanising complies with standard AS/NZS 4534:2006 W02.

Limitations

Care must be taken to install the mesh off the ground, particularly where moisture is present, as this can accelerate corrosion.

Handling & Storage

Rolls must be stored on end, under cover and protected from moisture. They must not be double stacked or used to support other materials. Rolls must not be stored on concrete floors for long periods, particularly where moisture is present.

Size Range Available

Product Code	Width (mm)	Mesh (mm)	Wire Dia (mm)	Length (M)	Weight (kg)	Barcode
